Fall-Planted Bulbs for
A Glorious Spring Garden

You and many other lovers of flowers will want a beautiful spring garden and we hope this book of bulbs will help you with your planting. No other season of the year has so great a charm to gardeners as spring. Soon after the first little Snowdrops announce that winter is on the wane, the colorful parade of flowers starts on its march. Crocus in gold and purple, crowned Daffodils, sweet-scented Hyacinths, and close upon them the brilliant colors of the garden favorite, the stately Tulip.

Right now, in the fall, is the time to plant the bulbs of all these beautiful flowers. And this is the year to plant liberally. The opportunity may never come again to have at such a small cost the garden you have always wanted. Just look at the low prices and remember that Maule's Bulbs are guaranteed to give entire satisfaction.

You know, of course, how easy it is to grow bulbs for winter flowering in the house. In addition to Tulips, Hyacinths, and Narcissus, we suggest that you grow some Crocus, Glory of the Snow, Scillas, and Grape Hyacinths to bloom indoors during the winter. The tender bulbs for growing in the house are described on page 14.

Crocus

Every lover of flowers appreciates the beauty of our spring-flowering Crocus. Long before most other plants show any signs of life they unfold their gaily-colored blooms. Plant Crocus liberally, particularly this year, when prices are so low. We recommend planting them in the border rather than the lawn to insure a continuous display for many years. For best results, the bulbs should be planted about 4 inches apart, and covered with 2 inches of fine soil. They also are easy to grow in bowls for winter blooming indoors.

Grass Seed *for Beautiful Lawns*

891 "Extra Quality" Lawn Grass Mixture

A mixture of the finest varieties of clean plump grass seed is the only logical choice where the home owner is interested in a truly beautiful and enduring lawn. Never yet has any authority on gardening ever recommended using anything but the very finest lawn grass mixture in order to secure a velvety, deep green, thick sod that will make a show throughout the growing season and last year after year. "Extra Quality" is a mixture of grasses which complies with the recommendations of the best authorities on lawns. It includes a choice of the finest grasses for lawn making and is free from ordinary kinds which have a tendency to form clumps that spoil the even, smooth appearance of the sod. A small quantity of White Clover has been included, as most gardeners prefer a lawn that contains White Clover for its thick texture and rich color. For fall sowing we recommend the use of one pound for each 200 square feet (10 ft. by 20 ft.). For repairing old lawns mix ½ lb. of seed with two bushels of good rich garden soil and apply as a top dressing.
